What is
Point of Sale (POS)?

Point of Sale (POS) is a system used by businesses to perform sales transactions for goods or services to customers. By using POS, a business can manage payments, track inventory, handle customer data, and monitor sales—all within a single application.

Challenges Faced by Business Owners Before Using Kledo POS

01
Manual Record-Keeping Prone to human error.

02
Limited Inventory Tracking Results in shortages or excess inventory.

03
Restricted Sales Analysis Lack of easy access to sales history, making decision-making difficult.

04
Ineffective Customer Management Challenges in tracking purchase history, customer identification, or offers.

05
Security Risks & Financial Mistakes Manual processes increase the likelihood of errors.

06
Limited Time and Productivity Manual processes limit efficiency.

07
Scalability Challenges Hard to adapt or scale when the business grows.

Why Switch to a
POS System?

Sales process automation

Inventory management

Sales & revenue tracking

Customer data management

Integration with other systems

Transaction security

Why

Point Of Sales
Sales Anywhere

No more manual records. Kledo POS automates sales transactions, including product details, pricing, quantities, and total payments.

Your staff can save time and reduce data entry errors, making sales faster and more efficient with just one app.

Easy Cash
Management

With Kledo POS, you can set cash limits and track cash movements easily within a single outlet, helping you manage and monitor your cash flow.

Fast & Accurate Refund Process

Kledo POS enables fast, accurate, and transparent refund processes.

This feature helps improve operational efficiency, manage stock, enhance customer service, and ensure financial accountability.

Accept Various Types of Payments

For businesses that need to track payments across multiple methods, Kledo POS is the perfect solution.

Kledo POS allows you to process payments through various methods—cash, non-cash, e-wallets, and EDC machines—making it easier for your business to handle payments.
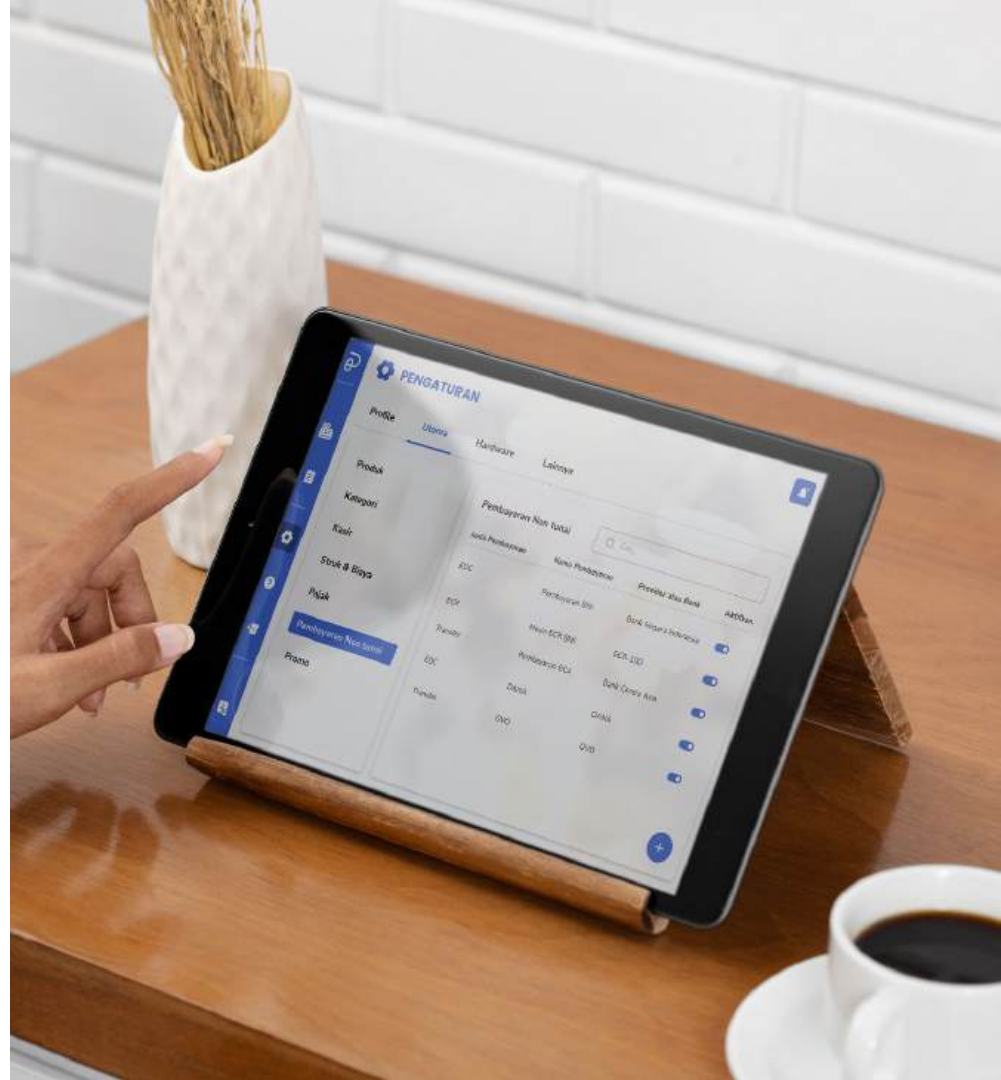

Easy Product Entry

Kledo POS offers a simple dashboard that makes entering product data easy to understand.

You can also track popular products to enhance sales, improve customer satisfaction, and make better decisions based on data.
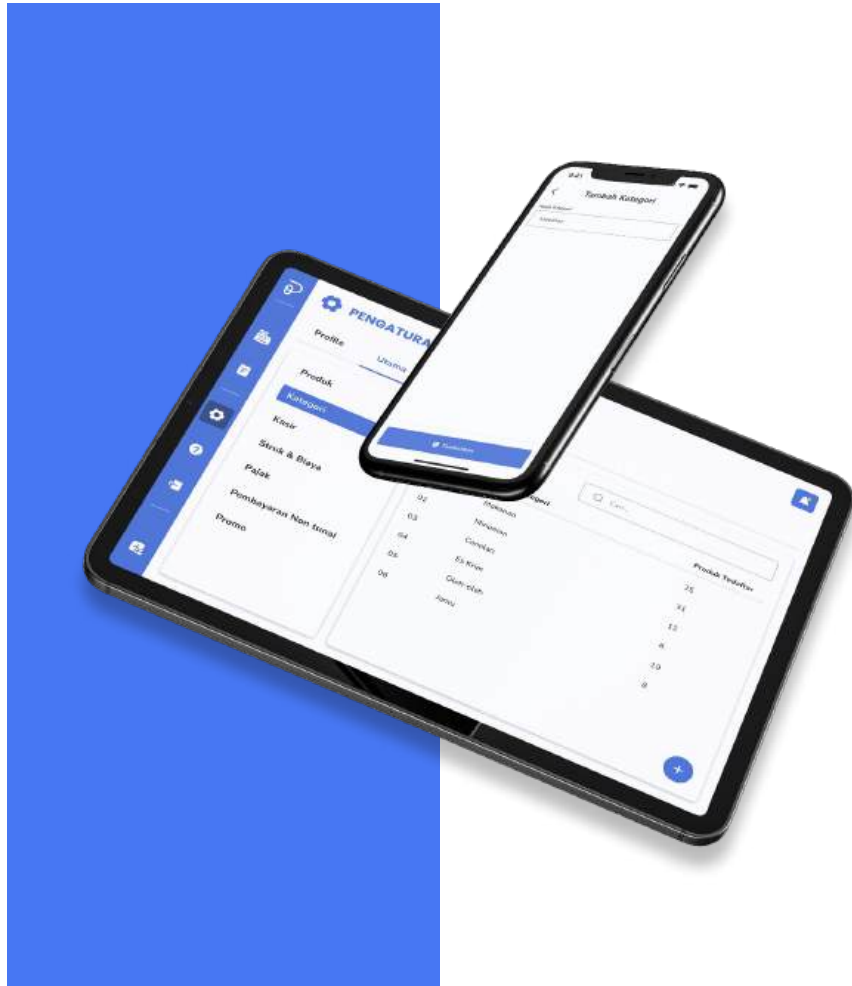

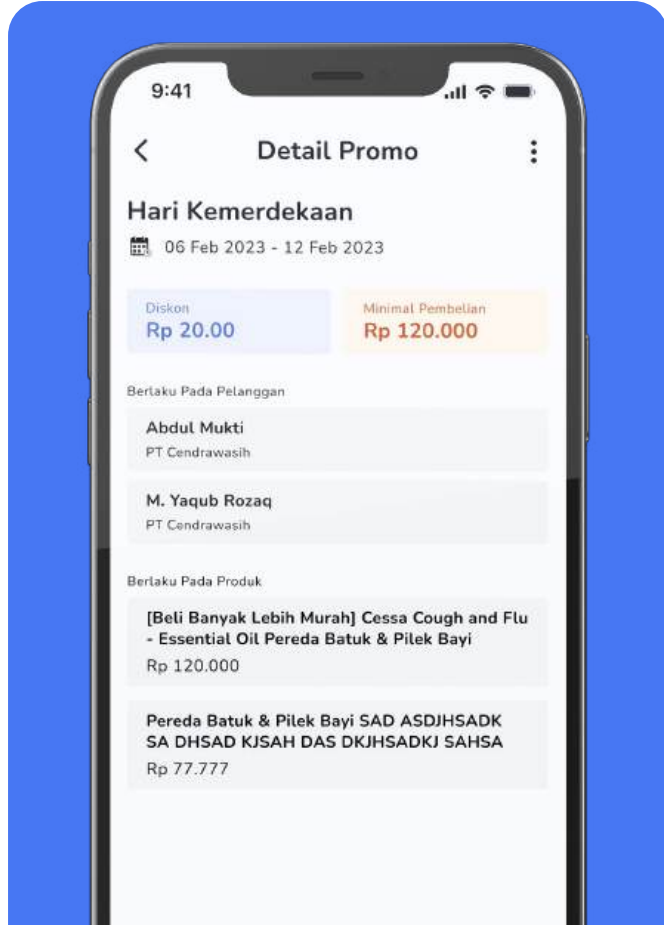

Product Categories and Units

Need to categorize the products you're selling? Kledo POS lets you add products according to the categories you need.

You can also manage product units from smallest to largest to match your business requirements.

Promo **Features**

Promotions can boost sales, expand markets, and strengthen customer relationships through attractive offers.

Kledo POS's promo feature is flexible, allowing you to set the promotion amount, products, duration, and who can access the promotion.
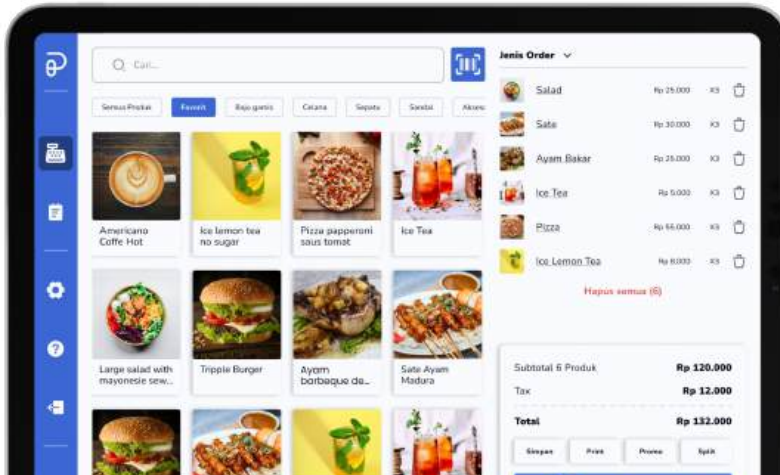

Offline or Online?
Why Not Both?

Kledo POS allows you to input data smoothly even without an internet connection (offline). Once data is input, you can synchronize it online so it can be recorded in Kledo Accounting Software.

Product **Monitoring**

Monitor your products easily with Kledo POS. Integrated seamlessly with Kledo Accounting Software, this feature helps you efficiently manage stock, avoiding shortages or overstocking.
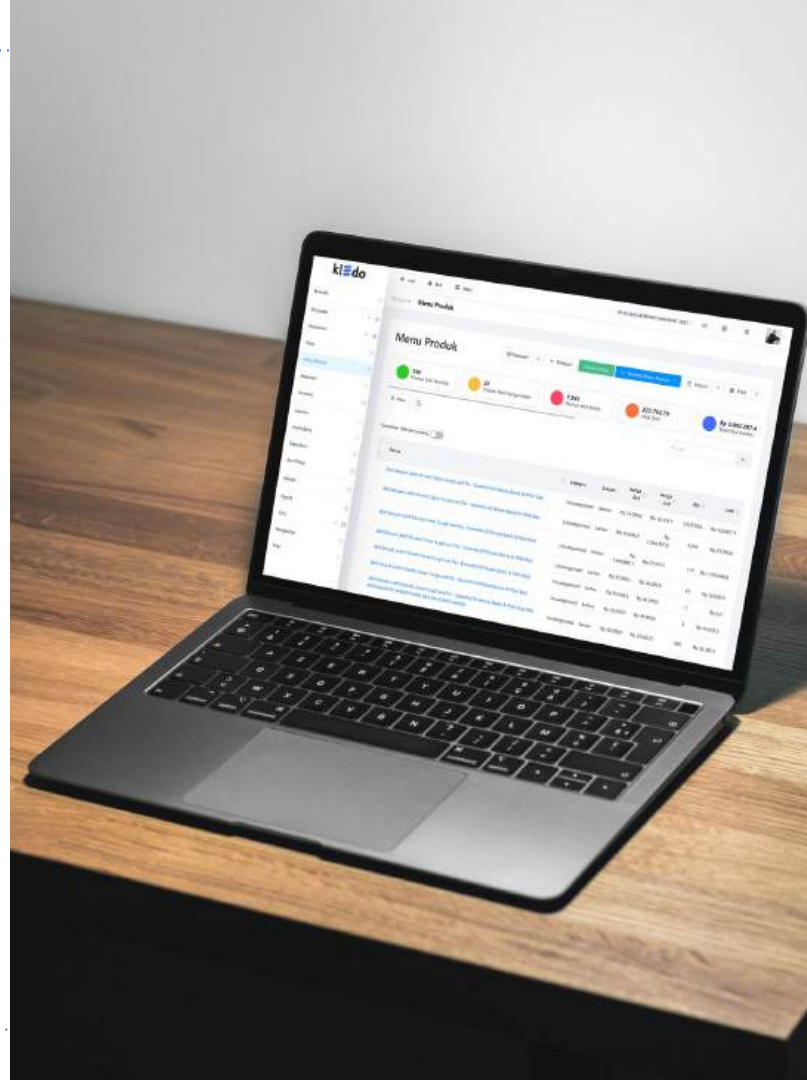

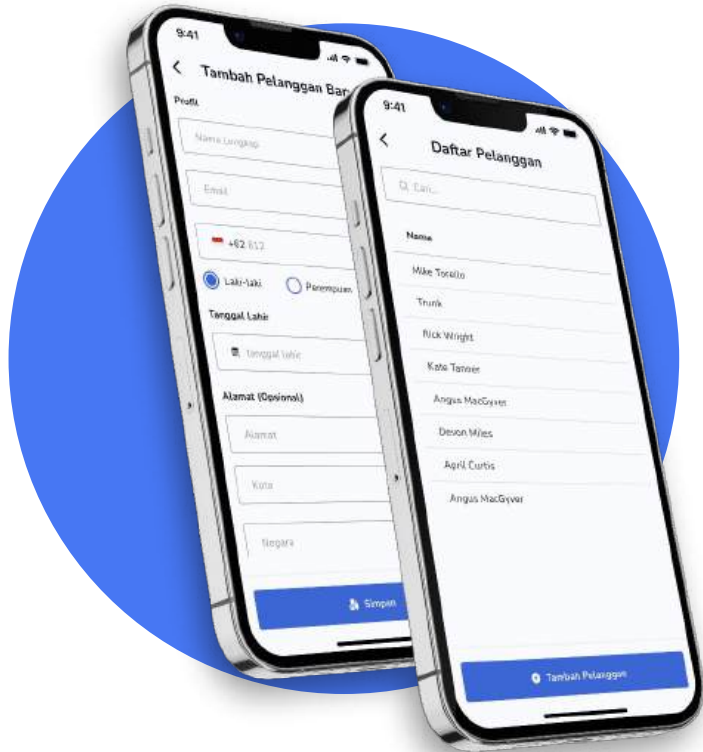

Receipt
Customization

Design your own receipts in Kledo POS by adding your logo, slogan, contact info, or Wi-Fi password. This enhances your brand identity.

Employee Data Entry

Easily add employee data, assign roles, and set access rights using Kledo POS.

Customer Profile

The customer profile feature allows you to track customer preferences, update contact info, and send paperless receipts, helping you understand your customers better and increase sales.

Multi-Store
Management

Got multiple stores? No worries!

With the multi-store feature in Kledo POS, you can monitor all your business outlets in one place, optimizing and improving business efficiency.
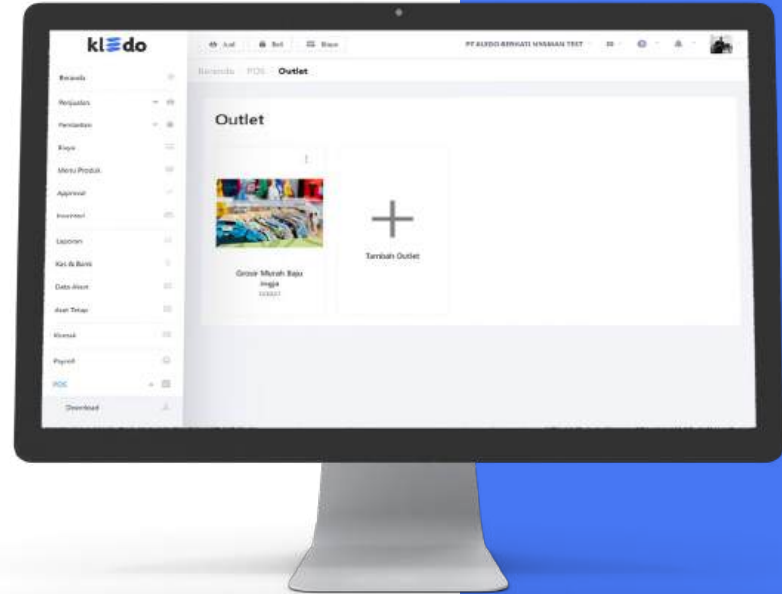

Sales
Reports

Still unsure how to view your sales reports?

With Kledo POS, you can easily analyze financial reports thanks to seamless integration with Kledo Accounting Software.

You'll be able to identify top-selling products and other sales trends, enabling you to make informed decisions regarding stock, pricing, and marketing strategies.
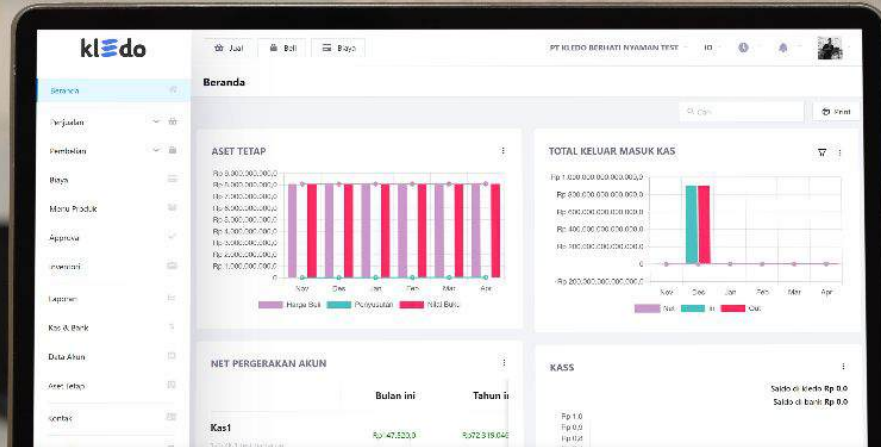

Accounting System

Integration

Are all your sales transactions still entered manually?

Kledo POS automatically records sales, purchases, and inventory data, reducing the risk of human errors in manual data entry.

This improves overall data accuracy, administrative efficiency, and allows for more comprehensive reporting.

International Standard
Data Security

Kledo POS is ISO/IEC 27001 certified, an international standard for Information Security Management Systems (ISMS), ensuring its reliability is beyond question.

Kledo POS's security team continuously monitors system logs, alerts, and events to identify and minimize threats.

All data communications are encrypted to prevent hacking during transmission.

Affordable **Pricing**

Switching to a cash register app doesn't have to be expensive.

Kledo POS offers the most affordable solution at IDR 39,900 per month, per outlet, giving you all the features you need at an unbeatable price.
